

GAURAV BISHT

BCA Student | Software Developer | Web Developer

Dehradun, Uttarakhand, India

Phone: 9411588827 | Email: gb376052@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY:

BCA student with hands-on experience in Python, JavaScript, web development, AI data evaluation, and SEO. Built functional applications including an e-commerce platform, trading bot, weather app, and interactive JavaScript applications. Interested in software development, automation, and AI/ML.

EDUCATION:

Bachelor of Computer Applications (BCA) — Alpine Group of Institutes, Dehradun | HNBGU | 2024–2027

Class XII — GIC Raingal, Almora | Uttarakhand Board | 83% | 2024

Class X — GHSS Joor Kafoon, Almora | Uttarakhand Board | 80.6% | 2022

EXPERIENCE:

Outlier.AI — Freelance AI Trainer / AI Data Evaluator

Remote | Freelance

- Worked on Astrakhan and Kepler AI projects, evaluating and labeling AI-generated responses using project-specific quality guidelines.
- Applied structured reasoning and quality assessment to improve AI model output accuracy and relevance.

SEO Intern & Trainee — Alpine Group of Institutes

Dehradun | 2026–Present

- Create and optimize SEO content for college and AMECEEE websites, including keyword research and on-page optimization.
- Perform keyword ranking analysis, social bookmarking, and SEO reporting to support website visibility.

TECHNICAL SKILLS:

Languages: Python, C, C++

Web: HTML5, CSS3, JavaScript

APIs: REST, Binance, Weather, Geolocation

Core: Data Structures & Algorithms, OOP, Problem Solving

Tools: Git, GitHub, VS Code, MS Office

Other: AI Data Evaluation, SEO, Digital Marketing

PROJECTS:

Binance Trading Bot | Python, Binance API

- Developed an API-based trading bot with market-data retrieval, configurable trading logic, and automated order execution.
- Designed modular parameters for customizable trading strategies.

[GitHub](#) | [Demo](#)

Prime Cart — Amazon Clone | HTML, CSS, JavaScript

- Built a functional e-commerce platform with product browsing, cart management, order placement, and email order notifications.

[Live](#) | [GitHub](#)

Weather Application | JavaScript, Weather API, Geolocation API

- Developed a location-based weather app that fetches the user's location and displays current weather and a 5-day forecast using live API data.

[Live](#) | [GitHub](#)

Mini Arcade Hub | HTML, CSS, JavaScript

- Built an interactive arcade featuring Snake, Tic-Tac-Toe, Rock Paper Scissors, Number Guessing, and Memory Match with individual game logic and scoring.

[Live](#) | [GitHub](#)

4-in-1 Calculator | HTML, CSS, JavaScript

- Developed a multi-purpose calculator combining Standard, Scientific, Tip & Split, and BMI functionality.
